Should the Bluetooth connection be always on? Will there be any delay? It is slow?

Answer: Before connecting the phone, connect the mobile phone to the watch back. When the mobile phone and the watch Bluetooth are successfully connected, the watch will automatically connect to the mobile phone. But the data stored on the watch is limited, and only about 100MB of data can be stored. When the space is full, the watch data will be automatically deleted to ensure the latest data. In addition, you can also use the watch to store data. In addition, you can also use the watch to store data. In addition, you can also use the watch to store data.

Will wearing the Hand for a long time cause harm to the human body?

Answer: The material of the support is the latest from the USA, made of the latest material, and it is highly compatible with the human body. It will not cause harm to the human body.
